

Arm rest RELAX 2D

Relieves back and shoulder pressure and allows full 360° movement. Fits SUPPORT models.

SWING arm rest

An arm rest that doubles as a back and abdominal support. Can swivel 360° for complete freedom and versatility.

Foot control

Intuitive height adjustment thanks to a foot-controlled ring. Fits all chair and saddle models.

Arm rest FIXED

A traditional arm rest that can be adjusted for height. Fits the SUPPORT chair.

Mini SWING

A high quality armrest that can swivel around your seat. Fits all saddles and chairs.

Foot ring

Ideal for taller seats where a long cylinder is attached and your feet don't reach the floor comfortably. Suitable for all models.

Saddle stool backrest

Lumbar support that can be adjusted for height and rake. Available in two models - Mini for rest and Core+ for posture support. They fit all saddle models except the Hybrid.

Backrest CORE+

Core+ is designed to naturally promote great posture so you can sit comfortably and stay healthy at the same time. It fits all saddle models except the Hybrid.

Castors

We stock a wide selection of castors suitable for a variety of different surfaces. The most common are castors for hard floors, which we fit as standard to all of our chairs and saddle stools.

A Support Design chair or stool is a wonderful thing

Each one is hand built and meticulously finished by our team of experienced craftspeople and technicians. We use premium upholstery materials in a vast array of colours. You can even customise our range to your own tastes and colour schemes.

We care about every single chair or stool that leaves our workshop and we think that's the reason our furniture has been making people sit better and feel better for over thirty years. Based on the ingenious SAGA and SUPPORT backrest and seat designs of Bruno Mathsson, we offer a wide range of models, each adapted to address specific user requirements.

Correct seating is PERFECT seating

The PERFECT saddle stool facilitates proper posture and is suited for professionals wishing to alleviate fatigue and prevent potential injuries caused during long procedures. The compact design offers improved freedom of movement on restricted surfaces.

The PERFECT saddle stool series includes two models, each with two different sizes. The base is chrome with soft castors designed for hard floors as standard. The gas spring is adapted to the height of the user for an optimal working position. Most saddle stools may be equipped with a foot control, backrest or other accessories.

SUPPORT

The bowl-shaped seat and sculpted backrest comfortably supports your back and shoulders, and the free-float functionality ensures intuitive manoeuvrability as the seat follows your every move.

AKKA

A traditional style chair with the benefits of a modern, ergonomic design. Fully adjustable with tilt and height functionality. Comfortable backrest combined with a shallow bowl-shaped seat.

PERFECT Core+

The Perfect saddle stool added with Core+ backrest helps to naturally achieve great posture and better muscle tone. Height and tilt levers allows a variation of sitting position.

TABURETT Assistant

Specially developed to be used by dental and medical assistants, the armrest provides flexibility and reach thanks to improved support to back, arms and abdominal areas. A high gas spring and foot ring offers easy adjustability, and the deep seat can be tilted to suit your needs.

TABURETT

Compact yet comfortable, the TABURETT is a great choice for those who want complete freedom of movement without the need for a backrest. The tilt setting allows you to adjust to your individual needs.

PRISMA

Minimalist design combines premium quality with a comfortable round seat. This stool is perfect for shorter procedures and features a height-adjust mechanism under the seat.

PERFECT Classic / Advanced

The Perfect Classic, is a soft, comfortable stool with a wide seat. Levers to adjust height and tilt are located just under the seat. The PERFECT Advanced, has the same comfortable wide seat as the PERFECT Classic, but features additional zones and specially developed indentations that provide additional comfort.

PERFECT Lite / Advanced

The PERFECT Lite saddle stool has an ergonomic design that promotes the spine's natural 'S' shape, as well as an ideal active sitting position. A small, soft stool with a narrow seat, gives users a more compact posture. The active sitting position stimulates blood circulation. The saddle stool allows free movement around your workstation. The PERFECT Lite Advanced features specially developed indentations to provide additional comfort.

PERFECT Lite Hybrid / Advanced

The PERFECT Lite Hybrid features an additional free-float function allowing the saddles to follow the movement of the user, activating the muscles in the lower back and abdomen. The free-float function can also be locked into a fixed position. The Perfect Hybrid Advanced features specially developed indentations to provide additional comfort.
