NEW INSTRUMENTS

KHAYAT | Endodontic Surgical Instruments

The Dr. Bertrand Khayat Endodontic Surgical Kit includes the new **PFI8ABK6** filling instrument, which has one angled, and one straight spatula end. Clinicians often only use one end on conventional spatulas, but both ends of this instrument are useful.

The straight spatula end is excellent for hard to reach areas in complex surgical procedures.

The **PLGBK6** Plugger, with its 4.5mm and 6.0mm working ends, is ideal for packing retrofilling materials. It was specifically designed for use in deep canal preparation.

Dr. Khayat has given over 200 presentations around the world, and has published the results of his research in many endodontic journals, including the Journal of Endodontics (JOE). Active in many associations, Dr. Khayat maintains his private practice in Paris, France.
